THE TRUTH ABOUT ELECTRIFYING SCHOOL BUSES!? 1

Report By Teja Allen-Tucker, Social Media Manager with FOA :tejamonea357@gmail.com

Why electrify school buses?!

Over the last month, we have been learning a lot of new information about electric school buses. Converting diesel school buses into all-electric can have so many positive attributes to our environment and our children's health!

Here are some facts about diesel school buses that should alarm you!

1. The pollution from regular school buses harm student's physical health and cognitive development
2. There has been increasing evidence that children are susceptible to the negative health impacts of the exhaust from diesel school buses
3. The World Health Organization has labeled the exhaust a carcinogen; which means that this pollution is capable of causing cancer in living tissue (US!)

We have a long way to go, but a healthier future is ahead of us!
